PROJECTS

- AQI Detection Alarm Device**

Oct 2025

 - Developed an electronic air-quality monitoring device to detect changes in Air Quality Index (AQI) levels.
 - Integrated air-quality sensors and an alarm system to provide real-time alerts when pollution levels exceed predefined limits.
 - Applied basic concepts of sensors, electronic circuits, microcontrollers, and environmental monitoring.
 - Assembled and tested the device to ensure accurate sensor response and reliable alarm functionality.
- Smart Campus Navigator | GitHub**

Oct 2026

 - Developed web-based campus navigation platform to help students **locate classrooms, offices, and other campus facilities**.
 - Implemented an interactive map with **location search and route navigation** for quick campus exploration • Designed a centralized interface for accessing **campus locations, events, and important announcements**.
 - Built a responsive UI to provide a consistent experience across **desktop and mobile devices**.
 - Tech Stack:** React.js, Node.js, Express.js, MongoDB, Maps API.

TRAINING

- Python Programming Training | YouTube**

Jul 2026

 - Explained core Python concepts including **variables, data types, operators, conditional statements, loops, and functions** through clear examples.
 - Demonstrated **hands-on coding and problem-solving approaches** to help beginners understand programming concepts.
 - Created and published the training content on **YouTube**, making the learning material accessible to students and programming.

CERTIFICATES

- Machine Learning | TOC Infosys**
- Learning Full Stack Development | Infosys Springboard**

ACHIEVEMENTS

- Solved more than **200** programming problems on online coding platforms during regular practice and learning.
- Achieved the **Leet Code 100 Days** Badge by maintaining consistent daily problem solving over time.
- Ranked **Top 10 among 50+ teams** in a college hackathon with an innovative web solution prototype.
